Danone

Freelance Photographer

Freelance 2019-present

Part-time Photographer

coffee-shop Ladushky 08,2020-present

Дополнительные сведения

Summary

I’m a junior UX/UI designer with a heavy photographer background. As a photographer I’m familiar with composition, light and a colour theory. It’s been more than a year now since I began studying application design for web, desktop and mobile apps. I make it my goal to provide efficient user-oriented design as beautiful visuals alone simply isn’t enough. I believe interface should be useable and intuitive to avoid unnecessary frustration for the users. I’m constantly keeping up with latest trends in user experience, interaction design and software development. Behance, Dribbble and Apple’s human interface guidelines are my friends and teachers. On a new job position I’d like to work side by side with a team of professionals to create new exciting products we will all be proud of.
Software: Figma, Tilda, Miro, Zeplin Adobe Photoshop, Adobe After Effects.
