Досвід роботи

The head of the Testing department

Westron LLC, Kharkov, Ukraine - www.westron.kharkov.ua., Харьков

(Company activities:

development and implementation of the Computer Information Systems, Radiation Monitoring Systems, Control Systems and Safety Parameter Display Systems for the nuclear power plants and fossil power plants;

automation of the technological processes of the chemical plants.)

The head of the Functional Design Group (from engineer including senior engineer and lead engineer)

Kharkov State Aerospace University (KAI), Харьков
(Development of the data processing software.

Position:

Laboratory assistant (the applied mathematics chair).)

RESEARCH-PRODUCTION

RESEARCH-PRODUCTION ENTERPRISE HARTRON-ARKOS LTD, Харьков
(Company activities:

development and implementation of the Control Systems for the missiles and satellites in aerospace industries;

development and implementation of the Computer Information Systems and Control Systems for the nuclear power plants and railway stations.)

Director of Special Testing

RESEARCH-PRODUCTION ENTERPRISE HARTRON-ARKOS LTD, Харьков
(Company activities:

development and implementation of the Control Systems for the missiles and satellites in aerospace industries;

development and implementation of the Computer Information Systems and Control Systems for the nuclear power plants.)

Ділові і особисті якості

схильність до аналітичної діяльності, вміння зосереджуватися на головному, відповідальність, пунктуальність, висока працездатність

Додаткові відомості

Skills

Programming languages (software tools): C,C++ (Borland C++ 3.11, Microsoft Visual C++ 6.0, Microsoft Studio Net, Sun Studio, Oracle Developer Studio), Pascal (Borland Pascal 5.5 - 7.0), Delphi(Borland Delphi 2.0-3.0), AutoLisp, Prolog, Fortran 77.

Database management systems: Microsoft Visual Fox Pro 3.0-5.0, Microsoft Access 95 -2016, Oracle Database 10-11g-18c Express Edition.

Network operating systems: Microsoft Windows NT/2000/Vista/10, Novell NetWare 3.11, VAX VMS/Sun OS 2.3-2.6/Solaris OS/Cent OS/Linux Mint,

Mathematical software: MatLab 6.1 – 2007.

Other software: Microsoft Office 95-2016, Corel DRAW 5.0-8.0, AutoCAD 10-14, Unigraphics, MS Visio Professional & Project.

Professional qualification: Elaboration of the technical requirements, development of the functional and software specifications, designing of the information systems, application software testing and software support, origination of the user's manual. The management of the testing department/test unit including the leadership of control systems' hardware and the software tests in many branches of industries.

Projects

Participation in the following projects:

I. The Control System for Linear electron accelerator of the neutron source facility (International project – in Ukrainian territory).

My job: Supervisory control of the development of all parts of control system. Elaboration of development, testing and acceptance plans. Holding meetings. Developing of test program and procedure for

software tests; electromagnetic compatibility, electrical safety, mechanical and climatic tests; developing of report documents for fire safety, reliability, radiation resistance.

Number of the involved people: 500.

II. The Control Systems of the railway stations of Ukrainian south-east railway on based of the microprocessor centralization (Local projects – in Ukrainian territory).

My job: Developing of test program and procedure for software tests; electromagnetic compatibility, electrical safety, mechanical and climatic tests; developing of report documents for fire safety, reliability.

Number of the involved people: 70.

III. The Control System of the rocket Cyclon-4 (International project – in Ukrainian territory).

My job: Developing of test program and procedure for electromagnetic compatibility, electrical safety, mechanical and climatic tests; developing of report documents for fire safety, reliability.

Number of the involved people: 260.

IV. The Radiation Monitoring Systems for Zaporozhye NPP Units 1-3 and Rovno NPP Units 3-4 (Local project – in Ukrainian territory).

My job: Development of the functional specifications, management of the project databases, development of the common test procedures, management of the verification and the validation

process, etc.

Accurate definition: Testing of the application software in Microsoft Visual Studio Net environment. Elaboration of the specifications and the test procedures based on Microsoft Office 2000.

Operating systems: Microsoft Windows 2000.

Number of the involved people: 25.

V. The Computer Information System for South-Ukrainian NPP Unit 3(International project – in Ukrainian territory).

My job: Development of the functional specifications, management of the project databases, development of the testing models and procedures, management of the verification and the validation process, etc.

Accurate definition: Development of the testing software on the basis of MatLab 7 environment and Simulink tools and creation of the test cases' scripts in CShell environment. Elaboration of the specifications and the test procedures based on Microsoft Office 2000.

Operating systems: Microsoft Windows 2000/Sun OS 2.6.

Number of the involved people: 30.

VI. The Computer Information Systems for Kozloduy NPP Units 5&6(International project – in USA/Bulgarian territory).

My job: Development of the testing models and procedures, testing of the application software, etc.

Accurate definition: Development of the testing software on the basis of MatLab 6.1 environment and Simulink tools and creation of the test cases' scripts.

Operating systems: Microsoft Windows NT/Sun OS 2.6.

Number of the involved people: about 80.

VII. The Computer Information Systems, Safety Parameter Display Systems for South-Ukrainian NPP Unit 1, Zaporozhye NPP Units 1&6 (International project – in Ukrainian territory).

My job: Development of the functional and software specifications, management of the project and unit-wide databases, coding and testing of the application software, etc.

Accurate definition: Development of the application software on the basis of SCADA systems Ovation/WDPF II (produced by Westinghouse EC) and Access 97.

Operating systems: Microsoft Windows NT/Sun OS 2.5.1

Number of the involved people: 35.

VIII. CAD's system for the missiles on-board software projection (Hartron RPE, Kharkov, Ukraine).

(Local project – in Ukrainian territory).

My job: Development of the software specifications (SS) and coding in Microsoft Visual Studio 5.0 environment.

Accurate definition: SS were created in compliance with European standard ESA PSS 05 00-05. My participation in this project was the following:

creation and management of the main database for the control objects and the activators database;

processing of database information (interpolation methods);

programming of the differential equations systems integrating methods.

Elaboration of the software based on Microsoft Visual C++ 5.0/Access 97.

Operating systems: Microsoft Windows 95/NT.

Number of the involved people: 10.

References

Available upon request.

Освіта

Kharkov State Aerospace University (KAI)

вища , с 2000 по 2006 (6 років)

A post-graduate training at the Chair of CAD's Systems. Candidate of science in the field of Control Systems Concentration: automation of the development technology of the control systems.,

Kharkov State Aerospace University (KAI)

вища , с 1993 по 1999 (6 років)

Aircraft Building Faculty. Diploma in information technology with distinction Concentration: programming languages, database management systems, operating systems, system programming, computer charting, computer graphics, network management, methods of ,
